What do I need to get a permit to build a deck, garage, or an addition to my house?

- (1). You will first need a plot plan. This should show lot size, existing buildings with their dimensions and measurements to lot lines. In a dotted line you should show your proposed construction along with sizes.
- (2). You will next need a cross section of your construction project. This will show footing sizes, foundations and material details to complete your project.
- (3). You will need a floor plan. This should include room sizes and their uses. Sizes of doors and windows.
- (4). Lot lines are the responsibility of the property owner to locate. If you are having trouble you may want to ask your neighbor if they know where any of theirs are or you may want to rent a metal detector. Your pin should be 1" pipe. If you have any other questions, please feel free to ask.

Building Inspector
